10. What questions will you ask, if you have a chance to meet a gastroenterologist?

Section - III

III. Answer all the following questions. 5 x 4 = 20m
Each question carries FOUR marks.

11. What are the components of the transport system, in Human beings? What are the Functions of these components?

12. A. Draw a neat labelled diagram of Heart.

    B. Draw a neat labelled diagram of **L.S** of Kidney.

13. Write the differences between Aerobic and Anaerobic Respiration.

14. Differentiate between blood vessels that carry blood from the heart and to the heart.

15. How are Alveoli designed to maximise the Exchange of gases?

Section - VI

IV. Answer all the following questions. 2 x 8 = 16m
Each question carries EIGHT marks.
Each question has an internal choice.

16. A. Explain the lab activity to prove that carbon dioxide is necessary for photosynthesis.

(Or)

B. How can you prove that chlorophyll is necessary for photosynthesis.

17. A. Write the experiment of the Fermentation process in yeast.

(Or)

B. Describe the structure and Function of Nephron.
