Name of the Student: _____

Sec : ALL

Sub: GENERAL SCIENCE

Time: 3 hours

Marks : 100

SUMMATIVE ASSESSMENT 2

I. Answer the following Questions

10 x 1 = 10m

1. Define cellulose.
2. Which type of clothes should be preferred in the month of June in India?
3. Define conductor.
4. Which acid is present in our stomach?
5. Write the equation to explain the process of neutralisation.
6. What are the main parts of a cell?
7. What are autotrophs?
8. What do you mean by digestion?
9. What kind of change is crystallisation?
10. Draw the symbol of Electric cell.

II. Answer the following Question.

8 x 2 = 16m

1. Why do we wear woollen clothes during winter?
2. What will happen if liver does not secrete bile juice?
3. Write an equation that represents the process of photosynthesis?
4. On what does the strength of an electromagnet depend upon?
5. Name any two effects of electric current.
6. Name the two modes of respiration.
7. Give any two examples of physical changes and chemical changes.
8. Is distilled water acidic / basic / neutral? How would you verify it?

III. Answer any FOUR of the following Questions.

4 x 5 = 20m

1. Discuss why wearing more layers of clothing during winter keeps us warmer than wearing just one thick piece of clothing.
2. Why do organisms take food?
3. Describe the process of neutralisation with the help of an example.
4. Differentiate between an open and closed circuit.
5. State the difference between physical and chemical changes.

IV. Answer any three of the following question.**8 x 3 = 24m**

1. State similarities and differences between the laboratory thermometer and the clinical thermometer.
2. How do plants prepare their own food? Describe briefly.
3. Write a comparative note on aerobic and anaerobic inspiration?
4. State differences between acids and bases.

V. Draw any two of the following.**2 x 5 = 10m**

1. Draw the photosynthesis diagram.
2. Show with the help of a sketch that plants are the ultimate source of food.
3. Explain the structure of a cell with the help of diagram.

VI. Blanks**10 x 1 = 10m**

1. The process of mixing a non-metal (or) metal to a molten metal is called_____
2. _____ take in readymade food prepared by the plants.
3. Small intestine is about _____long
4. The chemical nature of baking soda is_____
5. Gills are supplied with_____ for the exchange of gases.
6. The_____ the resistance, the greater is the current.
7. The range of a clinical thermometer in °F is _____
8. Tea contains _____acid
9. When the solution is basic, phenolphthalein gives a_____ colour.
10. Water and air are_____ Conductors of heat,

VII. Multiple choice Questions.**5 x 1 = 5m****1. Which of the following are called autotrophs?****[]**

- (a) Animals (b) microorganisms, (c) plants (d) insects

2. Temporary magnets are made of**[]**

- (a) brass (b) soft iron (c) Soil (d) lead,

3. Select the odd one out**[]**

- (a) Amla (b) soap (c) orange (d) Vinegar

4. A reliable measure of the hotness of an object is called its. []

- (a) pressure (b) speed (c) density (d) temperature

5. Chemically , rust is**[]**

- (a) iron (b) ferrous sulphate (c) iron oxide (d) none of these

VIII. Match the follow following.

5 x 1 = 5m

6. Bulb []

7. Switch in the on position []

8. Connecting wires []

9. Cell []

10. Switch in the off position []
