Name of the Student: _____

Sec :

Sub: BIOLOGY

Time: 3 hours

Marks : 50

SUMMATIVE ASSESSMENT 2

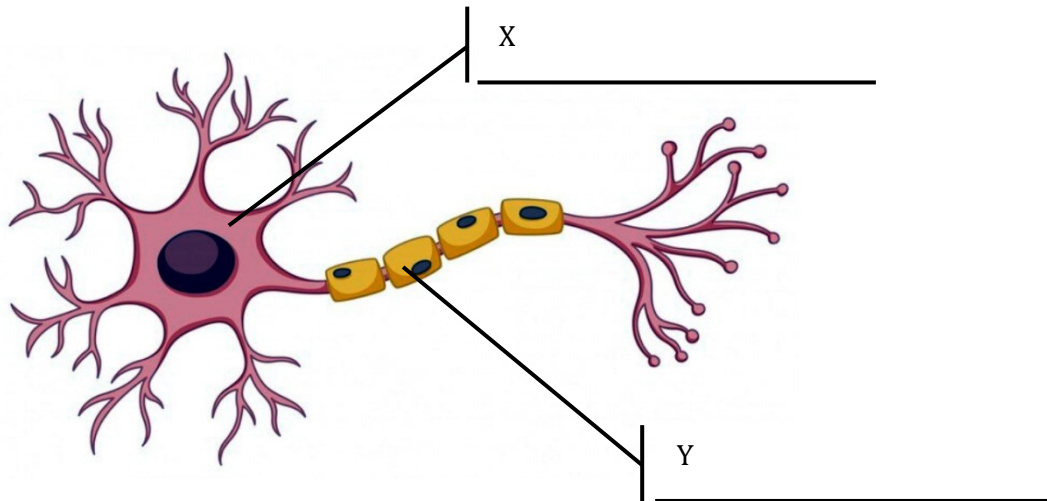

SECTION - I

NOTE: 1. ANSWER THE FOLLOWING ALL QUESTIONS

6 x 1 = 6m

2. EACH QUESTION CARRIES 1 MARK.

1. What are multicellular organisms?
2. Define matrix.
3. Identify the given figure name the x, y parts.

4. What are milch Animals?
5. How many types of Epithelial Tissues? What are they?
6. What are vascular bundle?

Section - II

NOTE: 1. ANSWER THE FOLLOWING QUESTIONS

2. EACH QUESTION CARRIES 2 MARKS

4 x 2 = 8m

7. Define ligament.
8. Why are lysosomes are called 'Suicidal bags of the cell'?
9. What is Lactation period?

10. Read the passage.

There are several nutrients which are essential for plants. Air supplies Oxygen, and Carbon, Hydrogen comes from water and soil supplies the thirteen nutrients to plants. Amongst these. Some are required in Large quantities and are therefore called Macro – nutrients. The other nutrients are used by plants in small quantities and are therefore called micro – nutrients.

a. **What are Macronutrients?**

b. **How many nutrients supplies from the soil to the plants?**

Section - III

NOTE: 1. ANSWER THE FOLLOWING ALL QUESTIONS.

2. LEACH QUESTION CARRIES 4 MARKS.

5 × 4 = 20m

11. Differentiate between chromoplasts and chloroplast.

12. A. Draw a neat labelled diagram of plant cell.

(Or)

B. Draw a neat labelled diagram of T.S of Dicot stem.

13. Why is the plasma membrane called as a selectively permeable membrane?

14. How can you differentiate the Manures from the chemical fertilisers?

15. Read the following passage and answer the given questions.

Connective tissues help in binding the other tissues and organs together and provide a Framework and support to various organs in the body. Areolar tissue is a type of connective tissue that helps in packaging and also help to keep organs in place. Fat storing adipose tissue is found below skin and between internal organs. Bone and cartilage form skeletal system which gives support to the body. Ligament connects bone to bone whereas tendon connects muscle with bone.

a. Which connective tissue is called packaging tissue?

b. What are the main components of skeletal system?

c. Which connective tissue joins Muscle with bone?

d. Where do you find adipose tissue in the body.

Section - IV

NOTE: 1. ANSWER THE FOLLOWING ALL QUESTIONS.

2. EACH QUESTION CARRIES 8 MARKS.

3. EACH QUESTION HAS AN INTERNAL CHOICE. 2 × 8 = 16m

16. A. How do you observe cheek cells under the microscope? Write experiment.

(Or)

B. Differences between xylem and phloem.

17. A. What is composite culture in fisheries? Describe some Advantages and disadvantages of it.

(Or)

B. Based on the kind of biological material used list two kinds of manures. How are they prepared?
