

**PCMR EM
SCHOOL**

SUMMATIVE ASSESSMENT - 3

Name :

Class : Jr. 10TH

Section : ALL

Subject : BIOLOGY

Marks : 50

Time : 3 Hours

Section – I

Answer the following questions

Each question carries 1 mark.

(6 × 1 = 6M)

1. Write a balanced chemical equation of photosynthesis.
2. What is Emulsification?
3. What is a life process?
4. Identify the process given in the diagram.

5. In which form carbohydrates are stored in plants?
6. Which instrument used for measuring blood pressure?

Section – II

Answer the following questions

Each question carries 2 marks

(4 × 2 = 8M)

7. What will happen if HCl is not secreted in the stomach?
8. Why is the rate of breathing much faster in aquatic organisms than in terrestrial organisms?
9. Read the following table and answer the questions given.

S.No	Digestive gland	Enzymes	Acts on
1	Salivary glands	Salivary amylase	Carbohydrates
2	Gastric glands	Pepsin	Proteins
3	Liver	No enzyme	Fats
4	Pancreas	Trypsin, Lipase	Proteins, Fats

- a. Name the digestive gland secretion that has no enzymes.
- b. Which enzymes acts on proteins?

10. What is fermentation? Give two examples.

Section – III

Answer the following questions

Each question carries 4 marks

(5 × 4 = 20M)

There is an internal choice in only the question number 12.

11. Write the differences between Autotrophic nutrition and Heterotrophic nutrition.

12. Draw a neatly labelled diagram of Human Heart.

(or)

Draw a neatly labelled diagram showing cross section of leaf.

13. How are the lungs designed in human beings to maximise the area for exchange of gases?

14. If haemoglobin level may decreases in our blood, what happens?

15. What precautions will you take for your dental health.

Section – IV

Answer the following questions

Each question carries 8 marks

(2 × 8 = 16M)

Each question has an internal choice.

16. A. Explain the lab activity to prove that carbon dioxide is necessary for photosynthesis.

(or)

B. What experiment do you conduct to prove the action of saliva on starch?

17. A. How do you demonstrate that the amount of carbon dioxide is more in air that we breathe out than we breathe in?

(or)

B. Write differences between the mode of respirations that takes place in the presence of oxygen and in the absence of oxygen.
