SCHOOL**

## SUMMATIVE ASSESSMENT - 3

Name :

Class : 6<sup>th</sup>

Section : ALL

Subject : MATHEMATICS

Marks : 100

Time : 3 Hours

### I. Fill in the blanks

(10x1 = 10M)

1. The smallest prime number is \_\_\_\_\_.
2. 1 is neither \_\_\_\_\_ nor \_\_\_\_\_.
3. An angle whose measure is less than that of a right angle is \_\_\_\_\_.
4. 1 lakh = \_\_\_\_\_ ten thousands.
5.  $12 + (-12) =$  \_\_\_\_\_.
6. Rs. 1 = \_\_\_\_\_ paise.
7. Which is greater: 0.07 or 0.02? \_\_\_\_\_.
8. When the sum of the measures of two angles is that of a right angle, then each of them is \_\_\_\_\_.
9. 1 cm = \_\_\_\_\_ mm.
10. 1 km = \_\_\_\_\_ metres

### II. Answer the following

(15x2 = 30M)

11. Insert commas suitably and write the names according to the Indian System of Numeration: **87595762**.
12. Write the next three natural numbers after **10999**.
13. Write the predecessor of: (a) **94**: \_\_\_\_\_ (b) **7654321**: \_\_\_\_\_
14. Write all the factors of **24**.
15. Write the first five multiples of **8**.
16. Write down separately the prime and composite numbers less than **20**.
17. Using divisibility tests, determine which of the following numbers are divisible by 2:  
○ (a) **572** (b) **6000** (c) **21086** (d) **951** (e) **2198**

18. Classify the following curves as (1) Open or (2) Closed:

a

b

c

d

19. What fraction of a clockwise revolution does the hour hand of a clock turn through when it goes from 3 to 9?

20. Write opposites of the following:

- (a) Increase in weight (b) 30 km north.

21. Find the perimeter of

22. Write the fraction representing the shaded portion:

23. There are 20 girls and 15 boys in a class. What is the ratio of number of girls to the number of boys?

24. Solve: (a)  $\frac{1}{18} + \frac{1}{18} =$  \_\_\_\_\_

(b)  $\frac{7}{7} - \frac{5}{7} =$  \_\_\_\_\_

25. Find  $35 - (20)$ : \_\_\_\_\_

### III. Answer the following

(5 × 4 = 20M)

26. Find the rule which gives the number of matchsticks required to make the following matchstick patterns:

(a) A pattern of letter T as

(b) A pattern of letter Z as

(c) A pattern of letter U as

(d) A pattern of letter V as

27. Name each polygon:

a

b

c

d

28. Using the number line, write the integer which is 3 more than 5.

29. Express the following as mixed fractions:

○ (a)  $\frac{20}{3}$

(b)  $\frac{11}{5}$

30. Find the area of the rectangles whose sides are.

a. 3cm and 4cm

b. 2km and 3km

**IV. Answer the questions. Each question carries 8 marks. Internal choice is given for each question. (5 × 8 = 40M)**

31. **A.** A book exhibition was held for four days in a school. The number of tickets sold at the counter on the first, second, third and final day was respectively 1094, 1812, 2050 and 2751. Find the total number of tickets sold on all the four days.

**(Or)**

**B.** Shekhar is a famous cricket player. He has so far scored 6980 runs in test matches. He wishes to complete 10,000 runs. How many more runs does he need?

32. **A.** Renu purchases two bags of fertilizer of weights 75kg and 69kg. Find the maximum value of weight which can measure the weight of the fertilizer exact number of times.

**(Or)**

**B.** Determine the smallest 3-digit number which is exactly divisible by 6, 8 and 12.

33. **A.** Use the figure to name:

- (a) Five points
- (b) A line
- (c) Four rays
- (d) Five line segments

**Or**

**B.** Classify each one of the following angles as right, straight, acute, obtuse or reflex:

34.A. See the figure and find the ratio of:

- (a) Number of triangles to the number of circles inside the rectangle.
- (b) Number of squares to all the figures inside the rectangle.
- (c) Number of circles to all the figures inside the rectangle.

Or

B. If the cost of 7m of cloth is Rs.1470 find the cost of 5m of cloth.

35.A. In a mathematics test, the following marks were obtained by 40 students. Arrange these marks in a table using tally marks:

|   |   |   |   |   |   |   |   |   |   |
|---|---|---|---|---|---|---|---|---|---|
| 8 | 1 | 3 | 7 | 6 | 5 | 5 | 4 | 4 | 2 |
| 4 | 9 | 5 | 3 | 7 | 1 | 6 | 5 | 2 | 7 |
| 7 | 3 | 8 | 4 | 2 | 8 | 9 | 5 | 8 | 6 |
| 7 | 4 | 5 | 6 | 9 | 6 | 4 | 4 | 6 | 6 |

- (a) Find how many students obtained marks equal to or more than 7.
- (b) How many students obtained marks below 4?

Or

B. Following pictograph show the number of tractors in five villages.

| Villages  | Number of tractors                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  - 1 Tractor |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Village A |                                                                                                                                                                                  |                                                                                                  |
| Village B |                                                                                                                                                                                                                                                                     |                                                                                                  |
| Village C |         |                                                                                                  |
| Village D |                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                  |
| Village E |                                                                                                                                                                                  |                                                                                                  |

Observe the pictograph and answer the following questions.

- (i) Which village has the minimum number of tractors?
- (ii) Which village has the maximum number of tractors?
- (iii) How many more tractors village C has as compared to village B.
- (iv) What is the total number of tractors in all the five villages?
