

Class : 5th
Name : _____
Section : _____
Marks : 25
Time : 1h 30m
Subject : Computer

FA - 4

I. Fill in the blanks

5 x 1 = 5m

1. Apps like _____ use AI to tell you about traffic congestion and how long it will take to reach your destination.
2. AI is capable of understanding human language with the help of a concept called _____
3. _____ is a field that deals with the idea of computers replicating human vision.
4. AI- based apps use a highly accurate _____ for processing data.
5. _____ is a field that deals with building technology that can be used to program machines in a manner that the machines can learn independently.

Hint : Machine learning, NLP, Computer vision, Algorithm, Google maps.

II. State True or False

5 x 1 = 5m

1. Using AI, Gmail can reach your text and give suggestions for a quick reply. []
2. Alexa is a device that makes use of NLP to interpret voice commands. []
3. Machines require more time to process a huge amount of data than humans. []
4. Computer vision is a field that deals with the processing of language. []
5. E- Commerce apps use AI for product recommendations. []

III. Select the correct options.

5 x 1 = 5m

1. Which among the following is an application of AI? []
a) Healthcare b) Customer support c) Both a and b
2. Which among the following is not a voice- based assistant? []
a) Alexa b) Gmail c) Google Assistant
3. Netflix, YouTube, Spotify etc., are examples of _____ apps []
a) Streaming b) Scheming c) Spoofing
4. _____ is used to extract visual information from images and videos. []
a) Computer vision b) Machine learning c) Big data
5. NLP stands for Natural Language _____ []
a) Processing b) Process c) Programming

IV. Expand the full forms of following.

6 x 1 = 6m

1. AI : _____
2. CC : _____
3. BCC : _____
4. E - mail : _____
5. NLP : _____
6. TC : _____

V. Answer the 2 questions.

2 x 2 = 4m

1. What is machine learning?
2. Define NLP?
3. What is computer vision?
