

Class : 6th
Name : _____
Section : _____
Marks : 25
Time : 1h 30m
Subject : Mathematics

I. Solve the following problems

(4 x 2 = 8M)

1. Find the perimeter of the following figure:

2. Find the area of the following rectangles whose sides are 3 cm and 4 cm.
3. If there are 50 mangoes in a box, how will you write the total number of mangoes in terms of the number of boxes? (Use b for the number of boxes).
4. Find the perimeter of a triangle of sides 3 cm, 4 cm, and 5 cm.

II. Solve the following problems

(3 x 4 = 12M)

5. Find the cost of fencing a square park of side 250 m at the rate of Rs.20 per metre.
6. The area of a rectangular garden 50 m long is 300 sq. m. find the width of the garden?
7. Find the rule which gives the number of matchsticks required to make the following matchstick patterns. Use a variable to write the rule.

(a) A pattern of letter T as

(b) A pattern of letter Z as

(c) A pattern of letter U as

(d) A pattern of letter E as

III. Fill in the blanks

(5 x 1 = 5M)

8. Perimeter of a rectangle = _____

9. Perimeter of a square = _____

10. Area of a rectangle = _____

11. Area of a square = _____

12. Perimeter of an equilateral triangle is _____
