

I. Answer the following

(4 × 1 = 4M)

1. The animals that eat both plants and animals?

A. _____

2. Which is the main source of energy?

A. _____

3. What is the freezing point of water?

A. _____

4. A strong wind is called?

A. _____

II. Answer the following

(5 × 2 = 10M)

5. Which type of energy is used to fly a kite?

A. _____

6. What is a habitat?

A. _____

7. What are the factors affecting evaporation?

A. _____

8. Name two devices which use solar energy.

A. _____

9. Define force.

A. _____

III. Answer any two of the following ($3M \times 2 = 6M$)

10. What are the adaptive features of terrestrial animals?
 11. With a neat sketch, write the names of any two simple machines and draw them.
 12. How does evaporation and condensation take place in nature?
-

IV. Match the following

($5 \times \frac{1}{2} = 2 \frac{1}{2} M$)

- | | | |
|--|----------|----------------|
| 13. Animals that live on land — | () | a) Aquatic |
| 14. Long winter sleep — | () | b) Aerial |
| 15. Animals that live both on land and in
water — | () | c) Hibernation |
| 16. Animals that can fly — | () | d) Terrestrial |
| 17. Animals that live in water — | () | e) Amphibians |
-

V. Fill in the blanks with correct option

($5 \times \frac{1}{2} = 2 \frac{1}{2} M$)

18. Plants prepare food with the help of _____ energy. (*solar / mechanical*)
19. _____ is done when an object moves. (*energy / work*)
20. Birds and _____ can fly in air. (*rabbits / bats*)
21. The natural surroundings where an animal lives is called its _____. (*habit / habitat*)
22. Our earth is surrounded by a layer of air called the _____. (*atmosphere / storm*)
