

Class : 6th
Name : _____
Section : _____
Marks : 25
Time : 1h 30m
Subject : SCIENCE

FA – 4

I. Answer the following questions

(5 × 1 = 5M)

1. Define filament.
2. Define conductors.
3. Define switch.
4. What is meant by compass?
5. What are magnetic materials?

II. Answer the following questions

(4 × 2 = 8M)

6. Using the conduction tester on an object, it was found that the bulb begins to glow. Is that object a conductor or an insulator? Explain.
7. Name the two metals which are used to connect wires.
8. What is a magnet?
9. Which region of the magnet is more attracted to iron filings?

III. Answer any three of the following questions

(3 × 4 = 12M)

10. What are the essential elements of an electric circuit?
11. What are conductors and insulators? Give some examples.
12. What are the main properties of a magnet?
13. What are the different shapes of magnets? Where are the poles located?
