

Class : 8th
Name : _____
Section : _____
Marks : 25
Time : 1h 30m
Subject : **SCIENCE**

I. Answer the following questions

(5 × 1 = 5 marks)

1. "LED" stands for _____.
2. Give any two examples of good conductors.
3. Do liquids also conduct electricity?
4. What gas will be released if current passes through water using electrodes?
5. Draw the symbol of a cell.

II. Answer the following questions

(4 × 2 = 8 marks)

6. Why is it dangerous to touch an electrical appliance with wet hands?
7. What happens to a compass needle kept nearby when current flows in a wire?
8. Define what are good conductors of electricity.
9. What is electroplating?

III. Answer any three of the following questions

(3 × 4 = 12 marks)

10. How do you prove that distilled water does not conduct electricity?
11. Draw and label the parts of an apparatus of an activity showing the chemical effect of electricity by passing current through water.
12. Write any two situations where you observe electroplating.
13. Write an alternative device to check even weak electric current flow (in place of an LED tester).
